

### REMARKS

This Preliminary Amendment is filed concurrently with a Divisional Patent Application. New Claims 9-12 are submitted to claim additional subject matter disclosed in the application. New matter is not added.

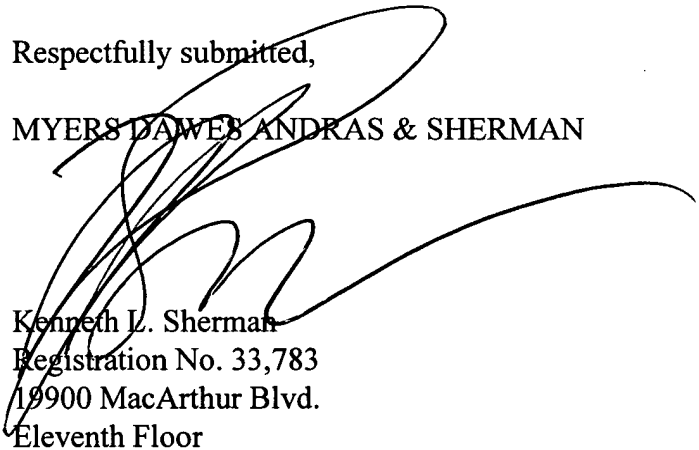

Please charge any additional fees or credit any overpayment to our Deposit Account No. 01-1960. A duplicate copy of this letter is enclosed for that purpose.

### CONCLUSION

If the Examiner believes that a telephone interview will help further the prosecution of this case, Applicant respectfully requests that the undersigned attorney be contacted at the listed telephone number.

Respectfully submitted,

MYERS DAWES ANDRAS & SHERMAN

## **VERSION WITH MARKINGS TO SHOW CHANGES**

Please replace Page 17, lines 23-26 with the following amended paragraph:

Read DHCPDB() is the workhorse of GENIP, handling the setup and execution of DHCPAMD as well [s] as reading the resultant output therefrom, reading the same into the “current” database, comparing with the “previous” database, and then writing a new “output” database for the clients.

Please replace Page 27, lines 21-30 with the following amended paragraph:

Each source-like capability has a complementing sink-like capability that is compatible with it. For example, the outputting video capability of one home device is complemented by the accepting video capability of a second home device. Each capability is associated with a certain set of data specifications. For example, when a DVCR outputs a video signal, the video signal is broadcast on a particular stream [of the] over the home network. The stream number and other information about the signal form part of the DVCR's (outputting home device) data specification message. Therefore, in one embodiment, to execute a session, a first home device (outputting home device) communicates a data specification message to a second home device (accepting home device) via the session manager.

3. (Twice Amended) The method of claim [1] 9, wherein the step of creating the device link page includes the steps of:

detecting a logical device name from [the] a device like file;  
storing the logical device name in the device link page; and  
converting the logical device name to a device button.

4. The method of claim [1] 9, wherein the step of creating the device link page includes the steps of :

retrieving a device ICON image from a home device;  
creating a device button based on the device ICON image; and  
storing the device button in the device link page.

5. The method of claim [1] 9, wherein the step of creating the device link page includes the steps of:

Retrieving a device LOGO image from a home device;  
Creating a manufacturer device button based on the device LOGO image; and  
Storing the manufacturer device button in the device link page.

6. The method of claim [1] 9, wherein the step of associating a hyper-text link with each device button, includes the step of :

Retrieving a URL from a home device, wherein the URL is maintained in a properties file associated with the home device; and

Associating the URL with the device button that is associated with the home device.
